

Once entered the parterre I found a seat in the front rows to be able to enjoy the show ... and when the lights turned off here's the first super guest introduced by our CEO, Mirella Ferrero.

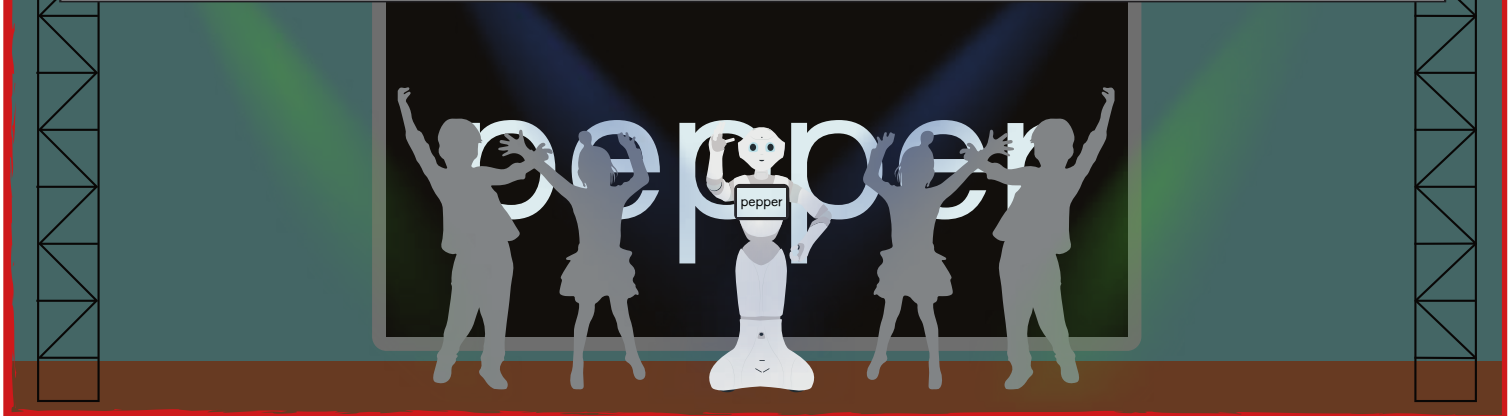

Our Christmas party has been a success. Come in with me to the most awaited event of the year and find out how we celebrated Christmas in Osai.

 **Osai** Christmas party

It's Pepper! The Intesa Sanpaolo's humanoid robot, that with his dad, Luca Calò told us something about him, and thanks to his young staff showed us what he's able to do. A great example of innovation and future.

But after looking forward to the future we decided to come back to the past with Arrigo Sacchi; the story of his victories made us understand and appreciate the importance of making team every day the secret of success.

Massimo Temporelli, entrepreneur, physicist, and founder of FabLab has been the last guest for the night. With him we made a journey between innovation and tradition, also thanks to EDO, his robot handleable by app.

And now up stair for the dinner! Let's get the party started with some typical Italian food and cheers!

Finally, to close our working year in the best way possible Dj Dula warmed up the party until late night!

SEE YOU NEXT YEAR...
