N° 3

After discovering with him the assembly solutions for the electronics market, today we will find out the Neo Mark series, born for Laser marking of electronic components.

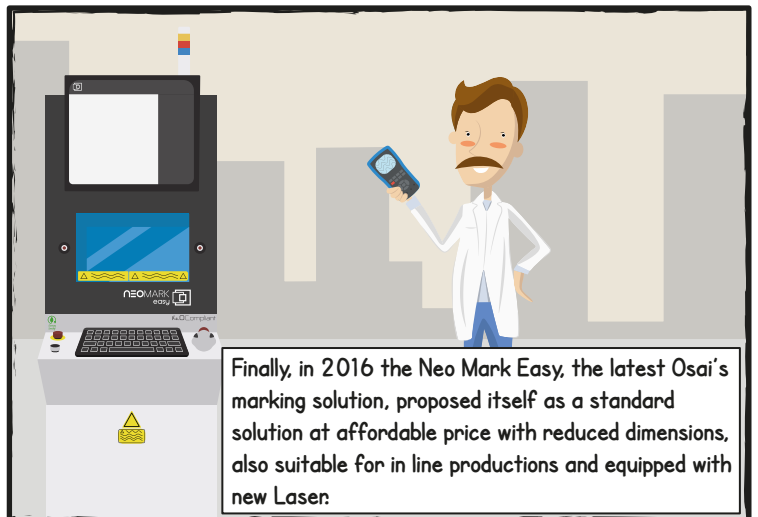

The first marking system, the Neo Mark 400 Performance was born in 2006 and allows to achieve high definition markings.

In 2008 Osai created his first Laser, designed and developed entirely by our engineers.

In the same year the Neo Mark Twin revolutionized our Laser marking system, thanks to its ability of operating simultaneously on the same product with YAG Laser and CO₂.

Finally, in 2016 the Neo Mark Easy, the latest Osai's marking solution, proposed itself as a standard solution at affordable price with reduced dimensions, also suitable for in line productions and equipped with new Laser:

Laser Marking CO ₂	Laser Marking YAG	Laser Marking GREEN	Laser Marking FIBER	
				Laser Depaneling XV
Today Osai's solutions are equipped with 6 different Laser: XV, UV, CO ₂ , YAG, Green e Fiber.				TO BE CONTINUED...
